

SARFARAZ SHEIKH

Data Analyst | Excel · SQL · Power BI · Python | AI & Full-Stack Background

+91 7999 581 257 | sarfarazsheikh810@gmail.com | Bangalore, India 560068 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven **Data Analyst** with hands-on experience turning raw data into actionable business insights. Skilled in **Excel (Advanced), SQL, Python, and data visualisation**, with a strong AI and full-stack development background that enables faster, smarter data pipelines. Built production RAG systems for pharmaceutical and legal teams — extracting structured insights from unstructured documents. Currently tracking operational trends and escalation patterns at Licious. Eager to bring a rare combination of **data fluency, technical depth, and business understanding** to a Data Analyst position.

CORE SKILLS

Data Analysis	Excel (Pivot Tables, VLOOKUP, Power Query), SQL (Queries, Joins, Aggregations), Python (Pandas, NumPy, Matplotlib, Seaborn)
BI & Dashboards	Power BI, Tableau, Google Data Studio — interactive dashboards, KPI tracking, data storytelling
AI & ML Tools	LangChain, RAG Pipelines, Claude API, ChatGPT, Copilot, Gemini, Perplexity, Cursor, NotebookLM
Development	React.js, Node.js, FastAPI (Python), Express.js, REST APIs, Git / GitHub
Databases	MongoDB, SQL (MySQL / SQLite),
Productivity	Microsoft Excel (Advanced), Word, PowerPoint — professional level
Soft Skills	Analytical thinking, data storytelling, stakeholder communication, Agile / Scrum, fast learning

DATA ANALYSIS PROJECTS

E-Commerce Sales Performance Analysis — Python · Pandas · Matplotlib · Seaborn · SQL

- Analysed a 50,000-row e-commerce dataset covering orders, returns, customers, and product categories across 3 years.
- Performed full data cleaning in Pandas — handled 1,200+ null values, removed duplicates, standardised date formats and currency fields.
- Wrote 20+ SQL queries to uncover top revenue categories, high-return products, peak sales periods, and customer lifetime value.
- Built visualisation report with 12 charts (heatmaps, bar charts, trend lines) revealing a 34% revenue spike in Q4 across all categories.
- Delivered a business-ready insight deck highlighting 3 actionable recommendations to reduce return rates by ~18%.

HR Employee Attrition Dashboard — Power BI · Excel · DAX

- Built an interactive Power BI dashboard on an IBM HR dataset (1,470 employees) to identify attrition risk factors across departments.
- Cleaned and transformed raw HR data in Excel Power Query — normalised salary bands, job roles, and satisfaction scores.
- Created 8 DAX measures including attrition rate by department, average tenure by role, and satisfaction-to-attrition correlation.
- Dashboard included drill-through pages, dynamic filters by age group, department, and gender — enabling HR team-style decision support.
- Key finding: employees in overtime roles with low job satisfaction had 3x higher attrition rate — visualised with a KPI card and trend chart.

IPL Cricket Season Analytics — Python · Pandas · NumPy · Plotly · Jupyter Notebook

- Conducted exploratory data analysis on 10 IPL seasons (2008–2018) covering 756 matches, 179,000+ ball-by-ball records.
- Merged multiple datasets (matches, deliveries, teams) using Pandas joins; handled inconsistent team names and missing venue data.
- Analysed win patterns by toss decision, venue, batting first vs. second, and top run-scorers and wicket-takers across seasons.
- Created an interactive Plotly dashboard with animated charts showing team performance trends year-on-year.
- Published clean Jupyter Notebook to GitHub with markdown commentary — structured for portfolio and recruiter review.

WEB DEVELOPMENT PROJECTS

VibeFlow — *React.js · Node.js · Express.js · MongoDB*

- Full-stack music streaming web application with user authentication, playlist management, and real-time audio playback.
- Built RESTful APIs with Node.js and Express.js; designed MongoDB schemas for users, tracks, and playlist collections.
- Implemented responsive React.js frontend with custom audio player controls, dynamic search, and smooth UX transitions.
- Deployed to production; integrated third-party APIs for track metadata and cover art enrichment.

Devnix — *React.js · Node.js · MongoDB · REST APIs*

- Developer productivity platform featuring project tracking, code snippet manager, and team collaboration tools.
- Designed a modular React.js component architecture with context-based state management for seamless multi-page navigation.
- Built secure Node.js backend with JWT authentication, role-based access control, and RESTful endpoints.
- Integrated GitHub API to surface repository activity directly within the dashboard for developer workflow insights.

KnowledgeFlow AI — Document Intelligence Platform — *Python · LangChain · FAISS · Pinecone · FastAPI · React.js*

- Engineered a RAG-powered document intelligence system enabling semantic search over pharma and legal document libraries.
- Built LangChain pipelines with OpenAI embeddings stored in Pinecone and FAISS vector databases for sub-second retrieval.
- Developed React.js frontend with document upload, semantic query interface, and analytics dashboard showing retrieval metrics.
- Exposed backend as a FastAPI service; documented all endpoints with OpenAPI specs for team adoption.
- Internally adopted at PhnyX Lab — measurably reduced manual document search time for domain research analysts.

PROFESSIONAL EXPERIENCE

Customer Happiness Cell (Operations Analyst) — **Licious**

Sep 2025 – Present • CURRENT

Bengaluru, India (Remote)

- Monitored daily customer interaction data, identifying recurring escalation patterns and process gaps to flag for team leads.
- Tracked operational metrics across delivery exceptions (CNR, RNR, delays), compiling weekly trend summaries for process review.
- Maintained structured logs of issue categories, resolution times, and customer feedback — feeding into operational reporting.
- Applied analytical thinking to streamline query resolution workflows, improving response consistency across the team.

Guest Relationship Associate — **PVR-INOX**

Jun 2025 – Sep 2025

Bengaluru, India

- Handled high-volume customer interactions; logged and categorised complaints for weekly reporting to operations management.

- Strengthened data-driven communication — translating customer feedback into structured summaries for operational improvements.
- Demonstrated adaptability, real-time problem-solving, and ability to work under performance metrics and KPIs.

Software Development Intern — PhnyX Lab

Mar 2024 – Sep 2024

Chhindwara, India (Remote)

- Engineered RAG-powered applications using LangChain and LLMs for pharma and legal document intelligence.
- Led development of KnowledgeFlow AI — an internal prototype that improved document retrieval accuracy for domain teams.
- Built React.js dashboards enhancing document search, filtering, and data-visualisation workflows.
- Integrated backend services with Pinecone and FAISS vector databases for semantic search.
- Conducted comprehensive API testing with FastAPI and documented best practices for future engineers.
- Collaborated within Agile/Scrum cycles, consistently meeting sprint delivery targets.

EDUCATION

MBA — Information Technology

Expected Dec 2027

Agrawal University (Pursuing)

B.Com — Bachelor of Commerce

Graduated May 2025 | 8.0 CGPA

Govt. P.G. Autonomous College, Chhindwara

CERTIFICATIONS & LEARNING

- ▶ **Data Analysis with Python & SQL** — TuteDude 2025 | In Progress
- ▶ **Advanced Excel** — Skill Course Completed
- ▶ **The Complete Full-Stack Web Development Bootcamp** — Udemy 2025 | 61.5 hrs

KEY ACHIEVEMENTS

- Awarded Academic Scholarship and served as Department Leader during B.Com — recognised as all-rounder in academics and extracurricular activities.
- Built and deployed 3+ full-stack and AI-powered projects (VibeFlow, Devnix, KnowledgeFlow AI) from concept to production.
- Designed KnowledgeFlow AI, adopted internally at PhnyX Lab — reducing manual research time for analyst teams.
